RESEARCH COMMUNICATION WRITING COMPETITION

The Research Communication Writing Competition invites participants to explore how research can travel beyond academic journals and engage wider audiences. It offers an opportunity to rethink how complex ideas about ecology, conservation and society can be communicated through clear, compelling and accessible writing.

Participants may draw on published research or their own research to develop an article relevant to the Western Himalayas, spanning the natural and social sciences. Participants are encouraged to pursue questions that interest them and find meaningful ways to connect research with wider public conversations.

The competition values writing that combines research rigour with creativity and clarity. Winners will be announced on the official conference website (https://wilde.saryanfoundation.org) and the social media handles of Saryan Vigyan Foundation, and acknowledged during the two-day student conference at G.B. Pant Memorial College, Rampur, on 16–17 November 2026.
